## YELLOW BOOK ORDER FORM

The Yellow Book is a Fire Protection System; Design, Installation, and Maintenance guide designed by Mike Thrapp. The Yellow Book has been a work in progress for over 15 years, having traveled with Mike from Alaska to Eugene in the early 90's.

This document provides valuable code enforcement and application clarification by way of diagrams, check lists and explanative narrative and has been updated to reflect the 2010 Oregon Fire and Building Code requirements and current NFPA standards.

All proceeds from the sale of the Yellow Book go directly towards OFMA education efforts.
